PROFESSIONAL SUMMARY

Passionate and self-motivated Computer Programmer with 2 years of hands-on experience in web and system development, data entry and analysis, digital marketing, and server management. Skilled in designing user-friendly applications and managing back-end systems using modern tools like PHP, MySQL, JavaScript, and Laravel. Adept at developing efficient digital solutions, analyzing data for decision-making, and managing servers for reliable performance. Known for a strong work ethic, problem-solving mindset, and the ability to learn and adapt quickly. Seeking to contribute technical expertise and creativity to a forward-thinking team or organization.

SKILLS

- **Web & System Development:** PHP, MySQL, JavaScript, CSS, HTML, Laravel, Tailwind, Bootstrap
 - **Server & System Administration:** Linux/Ubuntu, Apache, phpMyAdmin, XAMPP
 - **Data Management:** Data Entry, Analysis, and Dashboard Creation
 - **Graphics Designing:** Basic to intermediate design skills
 - **Digital Marketing:** SEO, Social Media Marketing, Data-Driven Campaigns
-

EXPERIENCE

Freelance Web & System Developer

- Designed and developed responsive websites and web systems for small businesses and local organizations.
- Created POS and inventory systems for local pharmacies and small shops.
- Integrated third-party APIs to enhance system functionality.
- Developed dashboards for client data tracking and management.

Server & System Administrator

- Installed and configured Linux/Ubuntu servers for hosting websites and systems.
- Set up Apache, MySQL, and phpMyAdmin environments using XAMPP and manual configurations.
- Ensured system security through regular updates, firewall settings, and backup automation.

Digital Marketing & Data Analysis (self-driven)

- Managed social media pages and ran targeted campaigns using **Facebook Ads**, **Google Ads**, and **SEO strategies** to boost online visibility.
- Conducted data entry and analysis for client surveys using **Excel**, **Google Sheets**, and **Python (Pandas)**.
- Created visual reports and presentations to interpret digital performance metrics.
- Helped optimize user experiences and conversions for small e-commerce platforms.

EDUCATION

Ronro University | 2000 – 2050

Uganda | Certificate In CSE

- Pursued comprehensive training in Computer Science and Engineering.
- Covering advanced programming, algorithms, system architecture, and database management.
- Engaged in research and collaborative projects that enhanced problem-solving, critical thinking.
- practical application of modern technologies

Janan Secondary School

Uganda | Completed O-Level

- Gained strong foundation in sciences and humanities
- Emphasized technical subjects such as Computer Studies, Mathematics, and ICT
- Participated in school-based ICT projects and coding clubs

Magodes Primary School

Uganda | Primary Leaving Certificate

- Built early literacy and numeracy skills
- Gained first exposure to computing and problem-solving
